

NORMANDY

Wall-mounted drinker on stand

The NORMANDY drinker accumulates the advantages: drinking comfort, quality of the materials, resistance against shocks, safety for the animals, ease of installation and maintenance. An item of high quality at the service of your business.

Two types of valves possible:

A tube with adjustable flow rate from 0 to 20 l/min. Very light to push.

With adjustable constant water level

Designed for compactness

- ▶ Mounted on a stand against the wall, the NORMANDY with its small diameter takes up very little space.
- ▶ With its straight back and sides this drinker also fits perfectly in a corner while leaving the walls clear when they are sliding.

Comfortable, risk-free drinker

- ▶ Food-safe, UV resistant HDPE.
- ▶ The large bowl allows easy access to the water.
- ▶ The two optional valves allow you to choose between an adjustable flow rate offered by the tube version or an adjustable water level if you install the version with constant level.
- ▶ The drinking height can be adapted to the size of the animals by cutting the stand in two.
- ▶ The rounded shapes of the drinker and the stand avoid the risk of injuries to the animals.

The answer to reliability and sturdiness

- ▶ The sturdiness of the rotomoulded seamless HDPE drinker has been tried and tested.
- ▶ The stainless steel edge prevents the animals from chewing on the plastic rim.
- ▶ The double-walled, foam-filled PE stand is highly resistant to shocks and offers a first insulation of the water supply lines.
- ▶ The valve is protected from the animals by a stainless steel cover.
- ▶ An 80 W heating element (anti-freeze power set for the bowl and valve) keeps the drinker frost-free.

Ease of installation and maintenance

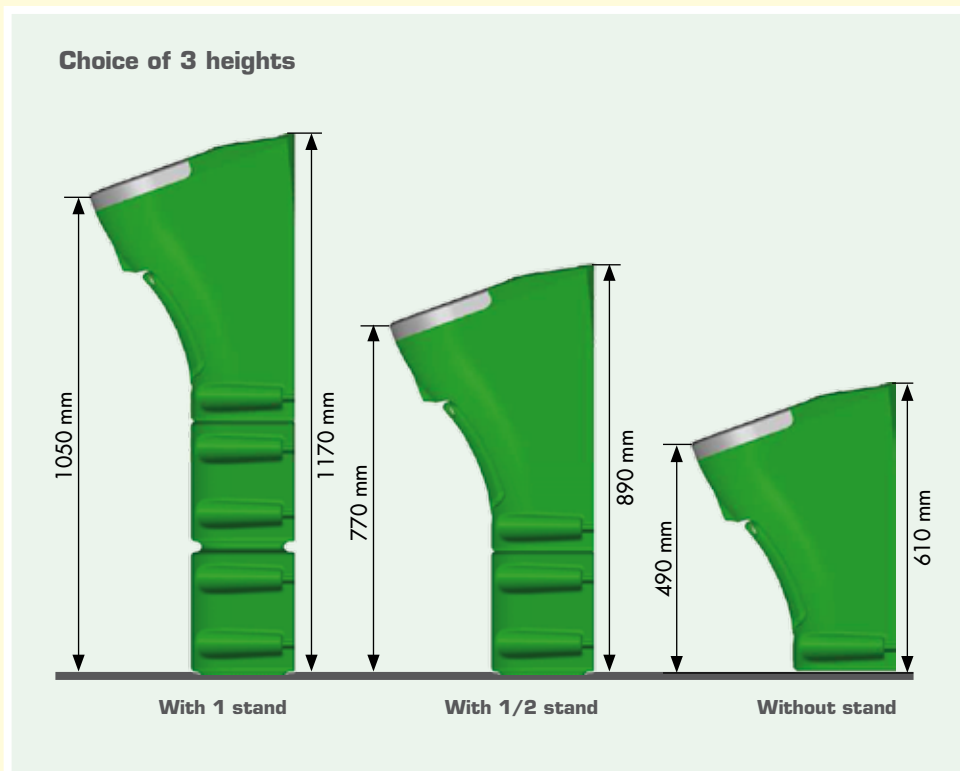

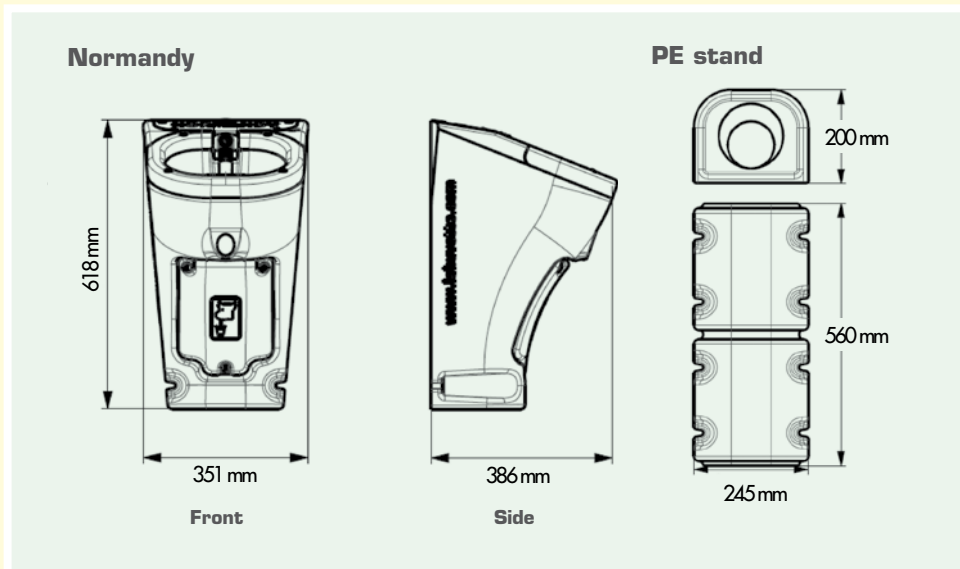

- ▶ The numerous fixing points allow easy and efficient wall mounting.
- ▶ Top or bottom connection possible.
- ▶ An access door allows easy connection to the water line and easy installation of an anti-freeze power set.
- ▶ Cleaning is made easy with the drain plug that can be removed without tools and the smooth interior of the bowl.

Ref. 1716 Normandy with push tube
EAN13 3599150046541

Ref. 1717 Normandy with constant level
EAN13 3599150046558

Ref. A-576 foam filled PE stand (sold separately)
EAN13 3599150046527

Dimensions

Our advice

If you go for the anti-freeze power set accessories, chose the corresponding 230/24V transformers (ref. A-501 to A-505).

Remember to adapt the cross-section of the power cable to the capacity and length of your installation (see chart in the mounting instructions) and you also have to install a fuse on the auxiliary power line.

Accessories

Anti-freeze set of 24 V/80 W to protect the bowl and valve.

Ref. A-396 NORMANDY power set 80W
EAN13 3599150046565

Heating wire to enhance frost protection of the water supply line.

Ref. C-162 Heating wire of 24V - 22W
3 m long

Metal protection to protect water supply line from above.

Ref. A-358 Galvanised water line protection
